- 2019 - Higher studies – Vilathikulam.

Projects:

- **Car-e Port** – A fully accessible and responsive car dealer website.

Live demo - <https://robinson29322.github.io/Car-dealer/>

Project - <https://github.com/Robinson29322/Car-dealer>

Designed and developed a responsive and accessible car dealer website by identifying user pain points through user research and journey mapping. Created information architecture, low-fidelity wireframes, and interactive prototypes to improve usability and user experience. The final design was transformed into a fully functional website with a clean interface.

Problem:

Discovered the user confused by lot of models, specs and price details leads to early drop-off. There was no clear option to connect with the showroom this leads to lack of inquire.

Solution

Suggested the brands over models and displayed top end models to reduce confusion. Price and specs were displayed clearly to scan and a simple contact form added is an added advantage.

Impact:

Made the browsing experience simpler by guiding users step-by-step from brand selection to model details. Then followed by specs and price lead to clear understanding. This helped improve clarity and made it easier for users to proceed toward inquiry or test drive.

Tools used

Figma, Figjam, HTML, CSS, JavaScript, Bootstrap.

- **Admin Dashboard UI Design:**

Designed a modern data-driven admin dashboard with light and dark mode variants focusing on usability and visual hierarchy.

- **Responsive Landing Pages:**

Created responsive landing page designs optimized for seamless performance across mobile, tablet, and desktop devices.

- **Mobile app User Interfaces:**

Designed user-friendly mobile application interfaces focused on usability, clarity, and smooth user experience.

Soft skills:

- User Empathy
- Critical thinking
- Collaboration
- Communication
- Problem solving
- Decision making

Languages:

Tamil and English
